Weather Forecast Report

The weather forecast for the upcoming week is as follows: Monday: *Sunny* with temperatures around **25°C**. Tuesday: *Cloudy* with temperatures around **22°C**. Wednesday: *Rainy* with temperatures around **20°C**.

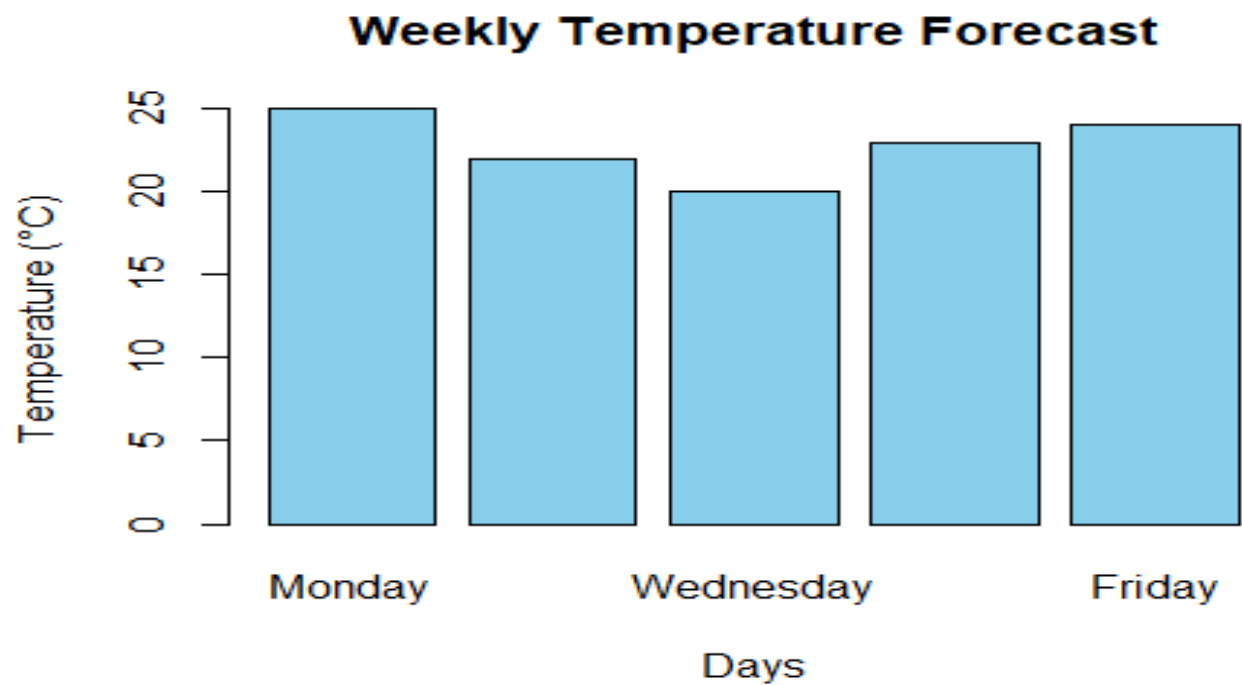

Introduction

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
days <- c("Monday", "Tuesday", "Wednesday", "Thursday", "Friday")
temperatures <- c(25, 22, 20, 23, 24)

barplot(temperatures, names.arg = days, col = "skyblue",
        main = "Weekly Temperature Forecast",
        xlab = "Days", ylab = "Temperature (°C)")
```

Data Analysis

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
